Sophie,

I'm not quite sure what happened with that application. It usually will not let you complete and validate the filing unless all of the data is there, so there must have been a glitch. Since I can't open that page again on IBFS, I can provide you with the data to those questions:

Form 312, Sched.B - Frequency Coordination
E51: Sat. Orbital Type: Geostationary
E52: Lower Freq. Limit: 3700 MHz
E53: Upper Freq. Limit: 4200 MHz
E54: Range of Sat. Arc Eastern Limit: 60 deg. West
E55: Range of Sat. Arc Western Limit: 143 deg. West
E56: Earth Station Azimuth Angle Eastern Limit: 144.5 degrees
E57: Antenna Elevation Angle Eastern Limit: 30.1 degrees
E58: Earth Station Azimuth Angle Western Limit: 243.6 degrees
E59: Antenna Elevation Angle Western Limit: 14.4 degrees
E60: Max EIRP toward Horizon: N/A

Please let me know if this format is not acceptable.

We appreciate all of your help on this one.

Gary,

I didn't make myself clear in what was needed. I have the attachment of the Frequency Coordination and Interference Analysis Report. What is needed is a completed FCC Form 312 - Schedule B (Technical and Operational Description) FREQUENCY COORD PAGE. This page was left blank in the application. This information must be a part of the application. If the applicant could e-mail me this page with the information filled out, or I could fax you a copy of the page that needs to be completed so I can continue to process this application.
Thanks

Sophie

Sophie,

Attached please find the Coordination Final Report.

Please let me know if you need anything else on this one.

We appreciate your help.

Gary
