Honorable Julius Genachowski  
Federal Communications Commission  
445 12<sup>th</sup> Street SW  
Washington D.C. 20554

To the FCC:

Thank you for this opportunity to comment on the matter of Google Fiber's application for building a high-speed broadband network and possibly launching a paid TV service. I appreciate having my views on this matter read and considered by the International Bureau's Satellite Division. I support the above referenced application as I believe it could result in real competition from Google Inc., to the duopoly cable and phone companies in the fixed broadband market. Google Fiber has the potential to be a massive disruptor to these companies with respect to their business models. Google believes in a more open web and would not institute arbitrary usage based billing and Internet Overcharging Schemes on users of its Internet Service.

That being said I know Google Fiber when launched later this year in Kansas City will be in trial compared to established providers and despite whatever Google Inc.,'s expansion plans might be they likely will not deploy everywhere in the country. Nevertheless, this is a great opportunity to inject more competition into the broadband and TV market even as Verizon SpectrumCo lessens it (12-4). Please submit final approval ASAP having determined whether to do so conditionally or unconditionally.

Mr. Maneesh Pangasa
