Call Sign E181018

Good afternoon again Trang
Yes this will work great and please do so make the correct changes.
I very much appreciate your help in this and hopefully all issues will be resolved now
Again please do reach out with any other questions or concerns and truly thank you for your help
Barry

Hi Barry,

For this site, our numbers show the angles would work
E57, antenna elevation in eastern limit be 10
E59, antenna elevation in western limit be 34.8
E56, antenna azimuth in eastern limit be 106.3
E58, antenna azimuth in western limit be 221.5

Just send in a separate email to confirm these corrections.

I would upload into your application's record and place it on the Public Notice for Acceptance.

Sincerely,
Trang Nguyen
