Dear Ms. Spriggs,

It is important that this antenna is protected for the entire satellite arc, so we just used the satellite positions for the entire North American arc. If preferred, we can use the designation ALSAT, or amend the west-most angle to 149 degrees.

Please let me know if you want to have the arc amended in the application.

Regards,

Cindy Hutter Cavell

Mr. Slabaugh,

The West Satellite Arc is 160 and I think its value should be less than 160. Can you verify that the West Satellite Arc value.

Thanks,
Jeanette
