

To whom it may concern at the International Bureau:

For application SES-REG-20180713-01875, an error was made when filling out the contact information for the satellite. The answer for E2 should have been Howard Fine and for E6 it should have been 310-287-3824. As this is a relatively minor change, we are requesting that the international bureau update these two fields in all of its records, including any authorizations that are made from this application.

Thank you for your assistance.
