

Exhibit for Construction Notification

This filing is to notify the Commission that construction and operation of the receive-only earth station dishes registered under call sign E181381 to NPG of Idaho, Inc. (“NPG”), pursuant to the Commission’s grant dated September 24, 2018, in File No. SES-REG-20180713-02192, commenced prior to April 19, 2018. NPG filed the application pursuant to the Public Notice issued April 19, 2018, *Temporary Freeze on Applications for New or Modified Fixed Satellite Service Earth Stations and Fixed Microwave Stations in the 3.7-4.2 GHz Band 90-Day Window to File Applications for Earth Stations Currently Operating in the 3.7-4.2 GHz Band*, Public Notice, 33 FCC Rcd 3841 (IB, PSHSB, WTB 2018).

NPG does not have definitive records of the precise date that construction of the dishes was complete, except that upon NPG’s information and belief, construction of the dish associated with Antenna ID Number 2 was completed in February of 2011. The remaining dishes were constructed and put into operation prior to Antenna ID Number 2, but the licensee has no record relating to the date the remaining dishes were constructed.
