

Erratum

Receive-Only Earth Station Registration on FCC Form 312

FCC Call Sign E190261

FCC Call Sign E190262

FCC Call Sign E190447

Between August 16 and August 30, 2018, Consolidated Communications Enterprise Services, Inc. ("CCES") filed a number of registration applications on FCC Form 312 for domestic fixed receive-only earth stations, including for the above-listed earth stations at Continental, Ohio, **call signs E190261** (file no. **SES-REG-20180816-03955**), **E190262** (file no. **SES-REG-20180817-03956**) and **E190447** (file no. **SES-REG-20180830-04140**).

Recently it has come to CCES's attention that these registration applications provided an incorrect street addresses for these earth stations. In Schedule B to FCC Form 312, fields E3, E4, E7, E8 and E9 the applicant provided the address of the contact person rather than the address of the earth station itself. In addition, field E10 (area of operation) was incorrectly listed as Continental United States.

The correct street address and location information for these earth stations is:

E3: Street: 1st Street
E4: Zipcode: 45831
E7: City: Continental
E8: County: Putnam
E9: State: Ohio
E10: Area of Operation: Continental, OH

The geographic coordinates (lat/long) provided for these earth stations on FCC Form 312 Schedule B are correct as filed.
