Dear Jae,

I am responding to your email correspondence sent to Ricardo Flores on October 2, 2019 regarding SES-REG-20180917-04417; Call Sign: E190755.

QUESTION 1: Clarification regarding the size of the antenna reflector(i.e., Field E32)

RESPONSE: Please be aware that the registered antenna is a Simulast Taural antenna with a major and minor axis, which permits it to downlink signals from multiple satellites concurrently without adjusting azimuth and elevation. Along its major axis, the antenna is 9.2 meters wide. Along its minor axis, the antenna is 5.2 meters high. Unfortunately, the FCC Form 312/Schedule B only permits one measurement in Field E32, which makes it difficult to accurately reflect antennas with main reflectors that are not circular.

To the extent that you want to input a single measurement in Field E32, [we recommend using 5.2 meters](#), which reflects the antenna's minor axis.

Please also feel free to review the specifications for the Simulast antenna at the following html address of the manufacturer: <https://www.atci.com/assets/simulast5b.pdf>
..*.*.

QUESTION 2: Clarification regarding the nature of any waiver request (i.e., Field 35)

RESPONSE: Per your email, I can confirm this field was checked "yes" because the application was not accompanied with a coordination. The FCC waived this obligation for all registered C-band antennas post-freeze pursuant to Public Notice (see DA 18-639), but we checked the box out of an abundance of caution.
..*.*.

If you have any further questions, please let me know.

Best regards,
Erika Lucas

Hi Ricardo Flores,

You answered to "yes" to 35.waiver request in form 312.
Is this for Frequency Coordination Report?
Please confirm.

Thanks.

35. Does the Applicant request any waivers or exemptions from any of the Commission's Rules?
If Yes, attach as an exhibit, copies of the requests for waivers or exceptions with supporting documents.

Yes No
