Hello Jae Lim,

Thank you for pointing out the error in our satellite dish location. It is my fault. I gave the wrong latitude to our managing partner, Neil Lipetzky, for his submission to you on the application for the satellite dish in Storm Lake, Iowa.

The correct latitude is 42 N, not 43.

So the correct location is 42 38 49.5 N 95 11 35.9 W

Is notifying you adequate to get this resolved or is there some other means to get it all corrected?

Thank you,

Steve Heaton
