Hi Jae,

I hope you are doing well. Thank you for reviewing the Church of Latter Day Saint's earth station registration. As you have seen, this is an unusual application that seeks waiver of the need to provide extensive technical data. This was done because the Church was registering approximately 3500 sites. The range of satellite arc (9-223W) and azimuth (94-0275) were actually agreed upon with Paul Blais prior to filing the applications. The idea was to provide the broadest possible range of arc and azimuth to cover the full 3500 sites. We filed applications for 50 sites at a time and thus the 50 sites on the application you are reviewing may not be reflective of all the sites. While we do not object to you changing the application, we would then anticipate that these changes would need to be made for each of the applications filed by the Church—which could be time consuming. If possible, we would ask that you consider whether the waiver request could be relied upon to permit continued processing with the original information.

We appreciate you inputting the information for site#42 if we inadvertently omitted. We did our best with so many registrations and may have missed that one.

Thanks,
Jen

Hi Bart Eichelberger,

I understand your application has multiple sites and you have a request to waive extensive technical data for each station.

I have made changes to your application and need you to confirm these changes for 50 sites of this

application.

SatArc 40-184W

Azim 102-258

Permitted List for PntComm

Same data for site#42 (not provided in your application)

Please confirm these changes for this application.

Thanks.

Jae Lim
