Trang,

The satellite dish is behind a building at 5606 Medical Circle in Madison WI 53719. There is a cell tower at the site with a tower registration of 1219903 with coordinates of 43-2'-57.0" N 89-28'-38.3" (NAD 83). The picture you attached is hard for me to tell where it's at. When I go to Google earth I can see the Satellite dish and when I put the curser over the dish it reads as 43-02'-56.33" N 89-28'- 36.66" W. I have attached an image from Google Earth of the site.

Hope this helps,

Rod Thannum
