

To whom it may concern at the International Bureau:

On the registration for E201238, a typo was made when entering the site address. Instead of 800 E 29th St in Muncie, Delaware, IN 47302 the site is actually at 9821 S 800 W Daleville, IN 47334 in Delaware County. We request this be updated on license E201238.

On the registration for E201316, two typos were made. The state of the earth station site was typed to be Ohio when in reality the site is located in Indiana, as indicated by the coordinates. Also, the FRN this was applied under, 00026841601 was incorrectly entered. The correct FRN should have been 0022678528. We request the FRN and associated licensee name, as well as the state be corrected on call sign E201316.

Thank you.

Sean Mattingly

Director of Technical Operations.
