**Subject:** Fw: Registration instructions - additional co-located antenna

Hi, Jae,

I see you have been assigned file number SES-REG-20210119-00068 in IBFS.

Please see the emails below regarding oddness in the satellite arc data.

Eastern Limit should be 0; Western limit should be 120.

Thanks,  
Kathleen

**Subject:** RE: Registration instructions - additional co-located antenna

Hello Kathleen

Yes, the status shows up as filed. (Application Submission ID: IB2021000203).

So in summary, on the Antenna Frequency Coordination section for both Antenna C1 and C2, we need to change section E54/55 from 55120.0/0.0 which is what shows up on our application, to 0.0/120.0.

Let me know if you need anything else in order to make that happen and as always, I appreciate your help.

thanks

It can be changed on our end, once it is filed. Have you submitted the application? If not, you could submit this page and an explanation as an attachment to the application asking us to fix that anomaly and the specialist processing the application will be able to fix it.

I'm not sure why that is happening on the HTML from your account, but there are occasional bugs in the HTML production, and they don't always show up in our system.

Kathleen

Hello Kathleen

We are 99.9% done except for this so to get straight to the source, the attached for section E54/55 should be formatted as 0.0 / 120.0 vs what you see in the attached which makes it look completely wrong. I am not sure how to input in the right format to have it look like it should.

I also assume once you tell the right format, it cant be changed on your end and I am going to do the whole copy form thingy all over again ??

thanks

Kerry we submitted our second modification to complete everything on the 312 however there's some silly field in the antenna frequency section that formats the number in a way that it may not be recognizable how can we get that corrected? I wasn't able to see the formatting until after I validated and submitted for filing I can see it on the print out after the fact. It doesn't appear to be us it appears to be the field itself

Thanks

Subject: Registration instructions - additional co-located antenna  
Importance: High

Hello,

Please find attached the registration instructions to follow to register Lafayette City Parish's additional co-located antennas (waiver request granted in DA 20-1258).

I understand that Lafayette City Parish previously filed a modification to add these antennas. It would be easier and quicker for the FCC to process the waiver granted if you would withdraw this previous MOD request and refile a registration application as described in the attached. Alternatively, we will dismiss or return without action the MOD request.

Thanks in advance,

Kerry Murray  
Deputy Chief  
Satellite Division  
FCC
