

This application relates to the operation of a domestic receive-only earth station located in Albany, Georgia which was previously registered to Cumulus Licensing LLC under File Number SES-MOD-20200901-00944 (the "Prior Registration"). Contemporaneous with the submission of this application, the licensee of the Prior Registration is submitting an application to modify the Prior Registration to remove the Albany, Georgia facility that is the subject of this application. Accordingly, the applicant of this application respectfully requests a waiver of the Commission's current freeze on issuance of new registrations, as this application represents the authorization of an existing earth station facility rather than the registration of a new facility. All technical information regarding the registration remains the same as the technical information reflected in the Prior Registration.
