Satellite Division  
International Bureau

Dear Ms. Dortch:

Mobile Satellite Ventures Subsidiary LLC ("MSV"), the licensee of the above-referenced fixed and mobile earth station authorizations to communicate with MSAT-1,<sup>1</sup> hereby notifies the Commission that MSAT-1 commenced operation in inclined orbit on July 1, 2007. *See* 47 C.F.R. § 25.280. Attached hereto is a letter from Mobile Satellite Ventures (Canada) Inc., the operator of MSAT-1, providing the information required in Section 25.280 of the Commission's rules.

Please contact the undersigned with any questions regarding this matter.

Very truly yours,

Jennifer A. Manner

Vice President, Regulatory Affairs

Re: Inclined Orbit Operation of MSAT-1

Dear Ms. Manner:

On behalf of Mobile Satellite Ventures (Canada) Inc. ("MSV Canada"), provided below is the information required by Section 25.280(a) of the Commission's rules and an acknowledgement of our understanding of the requirements of Section 25.280(b) of the Commission's rules.

*Information required under Section 25.280(a) of the Commission's Rules:*

- (1) The operator's name:  
Mobile Satellite Ventures (Canada) Inc.
- (2) The date of commencement of inclined orbit operation:  
July 1, 2007
- (3) The initial inclination:  
Approximately 0.05°
- (4) The rate of change in inclination per year:  
Approximately 0.9° per year
- (5) The expected end-of-life of the satellite accounting for inclined orbit operation:  
Beyond January 1, 2015

*Requirements specified in Section 25.280(b) of the Commission's rules:*

- (1) MSV Canada will periodically correct the satellite attitude to achieve a stationary spacecraft antenna pattern on the surface of the Earth and centered on the satellite's designated service area.

- (2) MSV Canada will control all interference to adjacent satellites, as a result of operating in an inclined orbit, to levels not to exceed that which would be caused by the satellite network operating without an inclined orbit.
- (3) MSV Canada will not claim protection in excess of the protection that would be received by the satellite network operating without an inclined orbit.
- (4) MSV Canada will continue to maintain its satellite at its authorized longitude orbital location in the GSO satellite arc with the appropriate east-west station-keeping tolerance.

Please feel free to contact the undersigned with any questions regarding this matter.

Very truly yours,

---

Bahman Azarbar  
Vice President, Regulatory Affairs  
Mobile Satellite Ventures (Canada) Inc.
