

Raytheon Company
Renewal of E010290
January 18, 2012

Description of Application and
Request for Waiver

By this Application, Raytheon Company (Raytheon) requests renewal of its earth station license identified by call sign E010290. The earth station is located in Norfolk, Virginia and its license expires on February 6, 2012. In connection with this Application, Raytheon respectfully requests a waiver of section 25.121(e) of the FCC rules. Section 25.121(e) provides that applications for renewals of earth station licenses be submitted no later than 30 days before the expiration date of the license. Raytheon only recently became aware that the license renewal date was imminent. Raytheon will operate the earth station subject to the existing operating parameters and conditions. Because grant of this request will allow Raytheon to provide continuity of service, there is good cause to grant this request.
