

EXHIBIT 1

APPLICATION FOR EARTH STATION RENEWAL

Pursuant to 47 C.F.R. § 25.131(h), DIRECTV Enterprises, LLC (“DIRECTV”) seeks renewal of its licenses (call signs E020241 and E020242) for fixed earth station sites. DIRECTV also seeks to update these licenses to correct their authorized geographic coordinates. DIRECTV certifies that the remaining license information has not changed.

During a review of its license records, DIRECTV recently determined that the authorized geographic coordinates (latitude and/or longitude specified in NAD-83) differed by more than one second from the actual location for some of its earth station antennas identified by Google Earth WGS84. In conjunction with this renewal application, DIRECTV seeks to update the FCC’s database to reflect the earth stations’ actual coordinates identified using Google Earth WGS84 as follows.

Call Sign	Site ID	City/State Location	Licensed Coordinates (Lat./Lon.)		Actual Coordinates (Lat./Lon.)	
E020241	CANOGA PARK	Canoga Park, CA	34° 15' 10.3"	118° 35' 39.1"	34° 13' 52.8"	118° 35' 8.2"
E020242	LITTLETON	Littleton, CO	39° 30' 52.0"	105° 1' 30.0"	39° 30' 48.5"	105° 1' 26.9"
