RE: Surrender of Authorization for E050039

A construction project on campus between our studio location and this emergency backup ES severed the communications and control capabilities. A further survey of the required repairs to return the ES to operational status has revealed that it will be cost prohibitive even with the successful Incumbent ES Lump Sum filing.

This ES will not be returned to operation and therefore, we will surrender the license.

Sincerely,

The image shows two handwritten signatures in black ink. The signature on the left is for Saxon Holbrook, and the signature on the right is for Ray Ekness. Both signatures are fluid and cursive.
