Jae-

You are correct, Intelsat 805 has been decommissioned and the licensed returned. Please feel free to delete Intelsat 805 as a Point of Communications. Additionally, I just noticed that Horizons **3e**, which replaced Intelsat 805, has a typo in the satellite's name—it is missing the "e" after the 3. If possible, please correct the satellite name (the call sign is correct).

Best,
Cindy

Hi Cynthia,

I hope all is well.

Intelsat 805@169 E. is retired and/or is no longer at 169 E.

You still have the Permitted List and I suggest we delete this PntComm.

Please confirm this.

Thanks and have a great safe weekend.
