Jae:
The earth station is not currently communicating with any of the satellites we have at 61.5° W.L. It does, however, have the capability to do so and we would like to keep that flexibility by maintaining our current authority to communicate with all U.S.-licensed DISH satellites at 61.5, 110, and 119 W.L. clusters. Please let us know if you have any questions.
Sincerely,
Chris

Alison,

I just checked your PntComm list and I do not see a satellite @ 61.5 WL.

Can you please verify with your team and let me know?

Thanks.

Jae,

Good morning; our team reviewed the list you sent.

Here is what the list should look like after unneeded entries are removed:

T3 and T4 -

to US LICENSED EchoStar and Dish satellites at 61.5, 110, and 119 WL clusters
to ECHOSTAR 10 @ 110.2 degrees W.L. (S2694) of the Direct Broadcast satellite system (U.S.-licensed)
to ECHOSTAR 11 @ 110 degrees W.L. satellite (U.S.-licensed)
to ECHOSTAR 14 @ 118.9 degrees W.L. (of the Direct Broadcast satellite system (U.S.-licensed))
to CIEL 2 satellite @ 128.85 degrees W.L. (CANADIAN-licensed satellite)

Let us know if you have questions.

Sincerely,
Alison Minea
