

PETITION FOR REINSTATEMENT

RCN License Subsidiary, Inc. hereby petitions for reinstatement of its earth station authorization E970430. Section 25.163(a)(3) of the Commission's rules allows for the reinstatement of a station authorization if the petition (1) is filed within 30 days after the expiration date; (2) explains why a timely renewal was not filed; and (3) sets forth specific procedures that have been established to ensure timely filings in the future.

In this particular case, this Petition is being filed within 30 days of expiration, which was October 10, 2022. Timely renewal was not filed due to inadvertently missing the filing deadline. A new calendaring system has been implemented to ensure timely renewal filings in the future.

RCN has a long history of timely filings and close compliance with FCC rules. Accordingly, RCN respectfully requests reinstatement of E970430.
