Subject: Corrections for Beaver, AK E2282

Towanda,

PLEASE ACKNOWLEDGE RECEIPT OF THIS E-MAIL.

The EIRP and EIRP Density values have been flip-flopped. Following are the corrected values:

E47: Emission Designator: 13K3G1E
E48: Max EIRP per Carrier (dBW) : 49.3
E49: Max EIRP Density per Carrier (dBW): 44.1

E47: Emission Designator: 86K4G1D
E48: Max EIRP per Carrier (dBW) : 57.4
E49: Max EIRP Density per Carrier (dBW): 44.1

E60: Max EIRP Density toward the Horizon (dBW/4KHz): 11.3

Hopefully this will resolve the problem; and, if it does, when can we expect a grant? Will you send me a fax or e-mail?? I'll be out of the office after 11:45 today, but if you need anything else, let me know and I'll get it tomorrow.

Thanks for your assistance.

Jane
