Subject: Neptune Pacific STA Application (FCC File No. SES-STA-20031002-01 363)

By this e-mail, Neptune Pacific License Corporation ("Neptune Pacific") requests that the FCC's International Bureau limit its grant of Neptune Pacific's pending request for Special Temporary Authority ("STA") (FCC File No. SES-STA-20031002-01363) to use of the requested conventional C-band frequencies for operation of its KA365 earth station. Once Neptune Pacific provides the International Bureau with an EMC analysis and the Bureau receives clearance from NTIA for use of the requested extended C-band frequencies, Neptune Pacific hopes that the Bureau will expeditiously grant Neptune Pacific STA to also use the extended C-band frequencies, pending Bureau action on Neptune Pacific's pending application for permanent authority to operate the KA365 earth station (FCC File No. SES-LIC-20031002-01362).

Counsel to Neptune Pacific will file a letter with the Secretary's office later today stating that Neptune Pacific has agreed to the above conditions placed on the subject STA. Should you have any additional questions regarding this matter, please do not hesitate to contact the undersigned.

Sincerely,

Todd B. Lantor
