12. Description

This (The 5.5M) antenna is to be used to provide overlapping service feeds to our affiliates during our up-coming transition from analog to digital services. It is to also be used as a backup service feed during routine maintenance of our existing antennas and/or in case of equipment failures. The upcoming service transition from Galaxy 5 to Galaxy 12 (Jan 10, 2005) will give us an opportunity to align & test this antenna on the transponder with which it is to be used, without an additional service outage.
