Re: DynCorp Information Systems LLC
 Transmit/Receive – Fairmont, WV

 Call Sign: E010141
 File Number: SES-MOD-20041119-01719

To Whom It May Concern:

DynCorp and the National Weather Service (NWS) are in the process of modifying the Backup Master Ground Station to transmit critical weather data to emergency managers and the general public through the United States and Puerto Rico. The mission of the NWS is to save lives and property. This is accomplished by delivering severe weather watches and warnings to the general public as quickly as possible.

The National Oceanic and Atmospheric Administration (NOAA) has awarded DynCorp with a contract to modify and manage the Backup Master Ground Station at Fairmont, West Virginia, 7.3. Meter C-Band two-way transmit and receive Earth Station. The 7.3 Meter Master Ground Station is used to transmit critical data to 130 Government locations throughout the U.S. and Puerto Rico.

DynCorp is requesting a Special Temporary Authority (STA) for the following FCC license modification for the Earth Station at Fairmont, West Virginia.

The current site is due to be upgraded on January 1, 2005. In order to test and implement the modification in time to terminate the old, DynCorp is requesting that an STA be granted for this site.

We are approaching the critical weather data period, and we hope that the FCC would grant the STA in order to continue providing the service without interruptions to the community.

Your assistance in this matter is greatly appreciated.

Sincerely,

Gerald A. Reed
