Ms. Lott,

Thank you for bringing this oversight to my attention so quickly. The points of communication for both applications should be the generic ALSAT designation to cover US satellites. Please let me know if there is any other information you need.

Regards,
Bill

Hello Mr.. Swart,

You filed for the above Life Church a New Application License Ku-band and a STA and you did not have on your FCC Form 312 Schedule B the Points of Communication Information that is needed for either one of your filings to process them for Public Notice. Please submit this information to me ASAP today by close of business.

Thank You
Eleanor M. Lott
