Scott

Got your voice mail, sorry I was out of town. This is the extension per our previous conversation. As you stated they had limited access because of the delays and now they expect everything is on schedule and need the dates indicated 27 Oct - 27 Nov. This is for the launch of an Astrium satellite via the Sea Launch off the West Coast. According to my conversations with the customer I feel they will fully use this STA. All technical parameters stay the same!

If you need anything please let me know.
