COMMENTS OF TELENOR SATELLITE, INC.

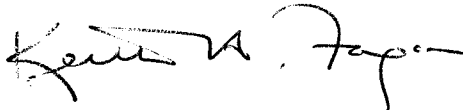

Telenor Satellite, Inc. (“Telenor”) hereby responds to the comments of Mobile Satellite Ventures Subsidiary LLC (“MSV”) in the above-captioned proceeding, which relates to Telenor’s request for special temporary authority (“STA”) to allow its earth station E980136 in Santa Paula, CA to communicate with the Inmarsat 3F4 satellite now located at 142° W.L. for the purpose of providing service to the Federal Aviation Administration (“FAA”) for its Wide Area Augmentation System (“WAAS”).

MSV does not oppose grant of the requested STA, but asserts that Inmarsat should be precluded from transmitting, and Telenor from receiving, in the MSS L band using the relocated Inmarsat 3F4 satellite. MSV’s concerns, however, are irrelevant to this STA request. For purposes of this STA, Telenor seeks only to provide service to the FAA on two C-band frequencies: 6445.42 MHz and 3639.42 MHz. It is undisputed that this service is in the public interest. Accordingly, Telenor’s STA request should be granted without delay, and without the conditions requested by MSV.

Telenor has also filed an application for permanent modification of its license for this earth station, in which it asked for authority to operate with Inmarsat 3F4 on a non-harmful interference basis in the same C and L band frequencies that are currently licensed. See File No. SES-MFS-20060405-00564 (filed Apr. 5, 2006). We presume that MSV will raise the same L-band concerns in that proceeding. Those L-band concerns lack merit and we will oppose them there. Again, however, those concerns have no bearing on the instant STA request.

Respectfully submitted,

TELENOR SATELLITE, INC.
