Subject: STA clarification

Dear Ms. Nguyen:

Per your request, we are providing additional information relating to the request filed by PanAmSat Licensee Corp. (PanAmSat) for Special Temporary Authority (STA) to operate a new earth station in Phillipsburg, NJ. PanAmSat needs the STA in order to test a data link between the earth station and the Galaxy 13 satellite, which is located at 127° W.L. The testing, which will employ a 128 kbps duplex carrier, will enable PanAmSat to verify the integrity of the data carrier. PanAmSat will be conducting the testing in anticipation of using the antenna, once it has been licensed, to support various launch missions, beginning with the upcoming Galaxy 16 launch.

Please do not hesitate to contact us regarding any additional questions you might have.

Respectfully submitted,

Joseph A. Godles
Counsel to PanAmSat Licensee Corp.
