Office of the Secretary

Re: Supplement to Request for Special Temporary Authority  
Fillmore, California Earth Station E4132

Dear Ms. Dortch:

PanAmSat Licensee Corp. ("PanAmSat") herein supplements its previously filed request for 30-day Special Temporary Authority ("STA"), from November 29, 2006 through December 29, 2006, to use its Fillmore, California C-band earth station -- call sign E4132 -- to test and provide launch and early orbit phase ("LEOP") services for the WildBlue-1 satellite that is expected to be launched on December 6, 2006.<sup>1</sup>

Specifically, PanAmSat confirms that for purposes of the WildBlue-1 LEOP mission, it is seeking to operate in the frequencies listed in the STA request at power levels not to exceed 26.5 dBW. The frequency coordination report submitted with the STA request reflected a higher power level of 28.7 dBW because that is the level at which PanAmSat might operate in the event an emergency necessitates the use of a higher power level in order to command the satellite. Because the power levels to be used during the nominal LEOP mission will not exceed 26.5 dBW, the antenna's transmissions will be conforming.

Please direct any further questions regarding this STA request to the undersigned at (202) 944-7848.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "S. Crandall", written over a horizontal line.

Susan H. Crandall  
Assistant General Counsel  
Intelsat Corporation
