Call Sign E050207 Grant Date 06/05/2007
(or other identifier)

Term Dates

From 06/05/2007 To: 08/03/2007

Approved: Eleanor M. Lott

EXPLANATORY STATEMENT

FiberSat Global Services, Inc. ("FiberSat") seeks modification of its existing Fixed-Satellite Service VSAT authorization (Call Sign E050207) to allow deployment of additional 1.8 meter remote units at locations throughout the continental United States. FiberSat was originally authorized in August 2005 to operate twenty-five (25) such remote units as part of this network, which is used to deliver digital copies of feature films and other special event video to movie theaters and other venues around the country.

Due to a misunderstanding concerning the number of remote units authorized through its initial license, FiberSat has continued to add remote antennas, and has now exceeded the number originally authorized. All of these terminals are technically identical to those permitted by the license granted in FCC File No. SES-LIC-20050711-00890 (August 22, 2005). In order to provide specific authority for these operations and enable anticipated substantial future growth, FiberSat hereby requests FCC authority to increase the total number of 1.8 meter remote VSAT units from 25 to 1000. The information provided in this application pertains only to the remote antennas. Operation of the existing 9.0 meter HUB Earth station located in Chatsworth, California will remain unchanged, and information concerning that facility is therefore omitted.

FiberSat is also filing, contemporaneously with this modification application, a request for Special Temporary Authority (STA) to permit it to continue operating its VSAT system with additional remote terminals.
