Re: Request for Special Temporary Authority  
Castle Rock, Colorado Earth Station KL-92  
File No. SES-STA-20070910-01255

Dear Ms. Dortch:

PanAmSat Licensee Corp. ("PanAmSat"), at the request of the staff of the International Bureau, herein supplements its above referenced request for Special Temporary Authority ("STA") for 30 days to use its Castle Rock, Colorado Ku-band earth station -- call sign KL-92 -- to provide launch and early orbit phase ("LEOP") services for the Intelsat 11 satellite that is expected to be launched on October 5, 2007.<sup>1</sup> The LEOP period is expected to last approximately 10 days.<sup>2</sup>

PanAmSat herein confirms that Comsearch has verified that DCI II, Inc. is not operating within the coordination contour of KL-92 and that DCI, II Inc. has given verbal clearance regarding PanAmSat's use of the antenna as proposed by this STA request.

Please direct any further questions regarding this STA request to the undersigned at (202) 944-7848.

Respectfully submitted,

Susan H. Crandall  
Assistant General Counsel  
Intelsat Corporation

<sup>1</sup> See PanAmSat Licensee Corp. Request for Special Temporary Authority, File No. SES-STA-20070910-01255 (filed September 7, 2007). Since PanAmSat filed its request, the expected launch date for Intelsat 11 has been moved to October 5, 2007. Accordingly, PanAmSat requests that this STA be granted for 30 days from October 5, 2007 through November 3, 2007, instead of the September 30, 2007 through October 29, 2007 period in the original request.

<sup>2</sup> PanAmSat is seeking authority through November 3, 2007 to accommodate a possible further launch delay.

Ms. Marlene H. Dortch
