

March 10, 2008

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
Washington, DC 20554

**Re: Nippon Television Network Corporation
Request for Special Temporary Authority
SES-STA-20080306-00243**

Dear Ms. Dortch:

As a supplement to the information provided by Nippon Television Network Corporation (“Nippon”) in the referenced pending STA request, we respectfully note the following:

- It is understood that the FCC’s RF guidelines may be exceeded in certain respects. Nippon will comply with the FCC’s Maximum Permissible Exposure (“MPE”) limits (1 mW/cm² for uncontrolled areas and 5 mW/cm² for controlled areas) as follows:
 - Uncontrolled areas – The area around the front of the antenna will be roped off at a distance sufficient to prohibit access by the general public to the areas that exceed the MPE limit. Radiation hazard signs will be posted at all times while the facility is in operation. The location will be selected so that no buildings will be in areas that exceed the MPE levels.
 - Controlled areas – Operational personnel will be barred from access to areas that exceed the controlled MPE level during all times that the facility is in operation. During periods of maintenance the transmitter will be shut off.
- Attached is a March 8, 2008 letter from Space Communications Corporation certifying that Nippon’s use of the proposed Swe-Dish elliptical aperture antenna will comply with the Commission’s requirements for preventing unacceptable interference into adjacent satellites in accordance with the Commission’s two-degree spacing policy. Nippon intends to comply with the installation and operational requirements specified in the letter.
- Attached is proof that Nippon’s three delinquent regulatory fees have been paid. The attachment consists of the three bills, a consolidated Fee Filer report, submission and payment confirmations and a confirming email. These were the only matters responsible for Nippon’s current “red light” status. Although we understand that the status may not be changed for at least one business day in the Commission’s database, we respectfully

submit in light of the attached proof of payment that the "red light" flag should no longer bar grant of the relief requested in the STA.

- Nippon's STA request is modified to pertain only to an uplink using the 14.0 - 14.5 GHz band for transmission. Thus, authorization is not being sought for the downlink/receive functions previously noted in the 12.250 GHz band.

Thank you for your attention to this request. Please let me know if any further information is needed.

Sincerely,

Peter Gutmann
Counsel for
Nippon Television Network Corporation

Enclosures

cc (email): Scott Kotler, Esq.

Space Communications Corporation

Federal Communications Commission
International Bureau
445 12th Street S.W.
Washington, D.C. 20554

To whom it may concern:

This letter certifies that Space Communications Corporation (SCC) is aware that Nippon Television network corporation (NTV), is seeking FCC authorization to access U.S.-licensed satellites ("ALSAT status") namely Superbird-C at 144EL and Superbird-B2 at 162EL, as the point of communications, using Ku-band transmit/receive antennas that are not strictly compliant with the FCC-2degree spacing requirements for off-axis sidelobe gain.

SCC understands that NTV will be deploying 0.90x0.66 meter elliptical aperture transmit/receive transportable earth station. The performance for this earth station and carrier parameter is provided below.

The terminal utilizes a 0.90x0.66 meter elliptical-aperture SWE-DISH antenna, IPT SUITCASE. This antenna generally exhibit their non-compliance in the region from 1.25 to 2.0 degrees off axis from maximum gain in the transmit band, due to the width of their main gain lobe. It's compliant with the sidelobe pattern requirements specified in Section 25.209 of the Commission's Rules at an off-axis angle equal to or greater than 2 degrees, in the transmit band. This antenna is to be installed with a nominal pointing accuracy of less than or equal to +/- 0.2 degrees and will operate at a maximum input power density at the antenna waveguide flange of -16dBW/4kHz.

Furthermore, in order to prevent unacceptable interference into adjacent satellites, SCC has been informed and NTV acknowledges that this antenna will be installed in compliance with the technical, operational and performance requirements of Part 25 of the FCC rules, operational conditions in any existing coordination agreements between SCC and the adjacent satellite operators and any requirements set forth in the licenses granted by the FCC for the above sub-meter antennas.

SCC and NTV acknowledge that the use of the SWE-DISH non-conforming antenna will not cause unacceptable interference into adjacent satellites in accordance with the FCC's 2-degree spacing policy and will not seek any additional protection compared to the case of an earth station employing an antenna conforming to the reference patterns defined in §25.209 of the FCC rules.

Space Communications Corporation

Mar.08 2008

Sincerely,

Handwritten signature of Mitsuru Sasamura in black ink.

Mitsuru Sasamura
General Manager, Network Service Engineering Division
Space Communications Corp.

Acceptance by NTV

NTV testifies that the information provided to SCC and reflected in this Affidavit letter is true and accurate to best of NTV's knowledge.

Handwritten signature of an NTV representative in black ink.
