Subject: Info for Pearl City, HI (E860046) STA Request
Importance: High

Towanda,

Following is the information you requested in order to complete the processing of AT&T's request for an STA at Pearl City, HI (E860046):

Range of Satellite Arc:

Degrees of Long.: 170.0w / 203.0W
Azimuth Range (Min/Max): 210.3 / 250.0
Corresponding Elevation Angles: 61.4 / 33.9

Max. EIRP density in any 4 KHz band for any of the emissions: 50.1 dBW/4KHz

The guys that are anxiously awaiting the approval of the STA have informed me the 7th was the drop dead date for Intelsat, but the communications they have is that it is the 7th @ 0600 GMT, making it today @ 8:00pm HST; therefore, any assistance you can provide today so that they have the proper authority will be greatly appreciated.

If you need any additional information, please let me know. I can be reached today at 770-513-2140 or via e-mail at pc924c@att.com.

Best regards,

Pam Cheeks
