Special Temporary Authority (STA) Request
C-Sat System - Alaska
C-Band Transmit Receive Earth Station

TeleAlaska hereby requests a Special Temporary Authority (STA) to allow for operation of a C-Sat system from 11 sites in Alaska. The hub antenna will be located in Anchorage, Alaska. The remote sites are in Cold Bay, Iliamna, Galena, Ft Yukon, King Cove, Nome, Sand Point, St George and St Paul. This STA request is necessary to permit TeleAlaska to provide communication services to the population at the remote sites referenced above. This earth station will be the only means of communication at this site. Due to the remote location of these sites, services would not be otherwise available. The earth station will provide access to emergency services and provide other communication needs. This STA is requested for a period of 60 days beginning 12/09/2008.

This STA is submitted in conjunction with a permanent license.

Operation will be limited to the Anik satellite located at 119 degrees west longitude. The bandwidth of operation is 17 MHz.

Included with the STA Request are the following

Frequency coordination report for each location
Radiation hazard studies - 4.5 meter and 3.8 meter antenna
Technical exhibit showing operational parameters
Antenna Exhibit for the 3.8 Meter Antenna

A copy of this STA was sent to the FCC office in Columbia Md
