

March 6, 2009

Scott Kotler
Chief, Systems Analysis Branch
Satellite Division
Federal Communications Commission
445 Twelfth Street Southwest
Washington, D.C. 20554

Dear Mr. Kotler:

On January 26, 2009, New ICO Satellite Services, G.P. filed a request for special temporary authority (“STA”) to use its North Las Vegas, Nevada S-band earth station to conduct in-orbit testing (“IOT”)(SES-STA-20090126-00068).¹ This request, filed electronically through the Commission’s IBFS website, identified the proper earth station (Call Sign E080035) in the attached narrative and title, but the file number in field 3 of the form was incorrect. The Commission, using the incorrect file number, the issued an authorization with the incorrect call sign.

By this letter, ICO requests that the authorization specify Call Sign E080035, as set forth in the narrative portion of the application.

Please direct any question associated with this request to the undersigned.

Respectfully submitted,

/s/ Suzanne Hutchings Malloy
Suzanne Hutchings Malloy

¹ An application for modification of earth station authority, to use the frequencies that are the subject of the STA request, has since been filed and was recently placed on Public Notice. *Public Notice, Satellite Communications Services Information, Satellite Applications Accepted for Filing*, Report No. SES-01113 (Feb. 18., 2009).
