FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PER, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

May 26, 2009

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, D.C. 20554

Re: Request for Special Temporary Authority
Fillmore, California Earth Station E4132

Dear Ms. Dortch:

PanAmSat Licensee Corp. ("PanAmSat") herein requests a grant of Special Temporary Authority ("STA")¹ for 30 days, from June 21, 2009 through July 20, 2009, to use its Fillmore, California earth station -- call sign E4132 -- to provide launch and early orbit phase ("LEOP") services for the MEASAT-1R satellite that is expected to be launched on June 21, 2009.² The LEOP period is expected to last approximately ten days.³

The MEASAT-1R LEOP operations will be performed in the following frequency bands:

- 6429.5 MHz, 6724.5 MHz, and 6722.0 MHz in the uplink, and
- 4185.0 MHz and 4186.0 MHz in the downlink.

The LEOP operations will be coordinated with all operators of satellites that use the same frequency bands and are in the LEOP path. All operators of satellites in that path will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs.

The 24x7 contact information for the MEASAT-1R LEOP mission is as follows:

Harry Burnham or Mike Munion
Ph.: (202) 944-7701

¹ PanAmSat has filed its STA request, an FCC Form 159, a \$175.00 filing fee and this supporting letter electronically via the International Bureau's Filing System ("IBFS").

² The satellite's final orbital location will be 91.5° E.L.

³ PanAmSat is seeking authority through July 20, 2009 to accommodate a possible launch delay.

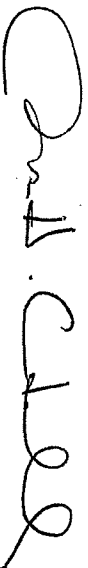

Ms. Marlene H. Dortch
May 26, 2009
Page 2

In further support of this request, PanAmSat is attaching Exhibits A through D, which contain technical information concerning the MEASAT-1R LEOP operations, as well as a waiver request. PanAmSat also notes that for purposes of the MEASAT-1R LEOP mission, it is seeking to operate in the frequencies listed in the request at power levels not to exceed 26.5 dBW. The technical information submitted with the STA request reflects a higher power level of 35.7 dBW, because that is the level at which PanAmSat might operate in the event an emergency necessitates the use of a higher power level in order to command the satellite.

Grant of this STA request will allow PanAmSat to help launch the MEASAT-1R satellite to the 91.5° E.L. location. This, in turn, will help ensure continuity of service to customers at that location, thereby promoting the public interest.

Please direct any questions regarding this STA request to the undersigned at (202) 944-7848.

Respectfully submitted,

Susan H. Crandall
Assistant General Counsel
Intelsat Corporation

Cc: Kathryn Medley

EXHIBIT A

PANAMSAT LICENSEE CORP.

SPECIAL TEMPORARY AUTHORITY REQUEST

EARTH STATION E4132

MEASAT-IR SATELLITE LEOP SERVICES

MAY 26, 2009

Exhibit A

PETITION FOR WAIVER OF SECTIONS 25.137 AND 25.114

Pursuant to Section 25.137 of the Federal Communications Commission's ("Commission" or "FCC") rules, earth station applicants "requesting authority to operate with a non-U.S. licensed space station *to serve the United States*" must demonstrate that effective competitive opportunities exist and must provide the same technical information required by Section 25.114 for U.S.-licensed space stations.¹ PanAmSat Licensee Corp. ("PanAmSat") herein seeks authority to provide launch and early orbit phase ("LEOP") services -- not commercial services -- to the United States, and thus believes that Section 25.137 does not apply.

To the extent the Commission determines, however, that PanAmSat's request for authority to provide LEOP services on a special temporary basis is a request to serve the United States with a non U.S.-licensed satellite, PanAmSat respectfully requests a waiver of Sections 25.137 and 25.114 of the Commission's rules.² The Commission may grant a waiver for good cause shown.³ The Commission typically grants a waiver where the particular facts make strict compliance inconsistent with the public interest.⁴ In granting a waiver, the Commission may take into account considerations of hardship, equity, or more effective implementation of overall policy on an individual basis.⁵ Waiver is therefore appropriate if special circumstances warrant a deviation from the general rule, and such a deviation will serve the public interest.

In this case, good cause exists for a waiver of both Section 25.137 and Section 25.114. With respect to Section 25.114, PanAmSat seeks authority only to provide LEOP services for the MEASAT-1R satellite. The information sought by Section 25.114 is not relevant to LEOP services. Moreover, PanAmSat does not have -- and would not easily be able to obtain -- such information because PanAmSat is not the operator of the MEASAT-1R satellite, nor is PanAmSat in contractual privity with that operator. Rather, an affiliate of PanAmSat has a contract with Orbital Sciences Corporation, the manufacturer of the MEASAT-1R satellite, to conduct LEOP services for the satellite.

The information that PanAmSat is not including is not required to determine potential harmful interference. The Schedule S information for this satellite would pertain to the operation of the MEASAT-1R satellite at its final orbital location. However, the present application for LEOP services involves communications *prior* to the satellite attaining its final location in the geostationary orbit. In other words, during the LEOP mission, the earth station will not be communicating with a satellite located in the geostationary orbit. Rather, it will be transmitting

¹ 47 C.F.R. § 25.137 (emphasis added).

² 47 C.F.R. §§ 25.137 and 25.114.

³ 47 C.F.R. §13.

⁴ *NE. Cellular Tel. Co. v. FCC*, 897 F.2d 1164, 1166 (D.C. Cir. 1990) ("*Northeast Cellular*").

⁵ *WALT Radio v. FCC*, 418 F.2d 1153, 1159 (D.C. Cir. 1969); *Northeast Cellular*, 897 F.2d at 1166.

to a satellite traveling on its “transfer orbit” or “LEOP path”, which starts immediately following its separation from a launch vehicle, and ends when the satellite reaches its geostationary orbital location. Moreover, as with any STA, PanAmSat will perform the LEOP services on a non-interference basis.

Because it is not relevant to the service for which PanAmSat seeks authorization, and because obtaining the information would be a hardship, PanAmSat seeks a waiver of all the information required by Section 25.114. PanAmSat has provided in this STA request the required technical information that is relevant to the LEOP services for which PanAmSat seeks authorization.

Good cause also exists to waive Section 25.137. Section 25.137 is designed to ensure that “U.S.-licensed satellite systems have effective competitive opportunities to provide analogous services” in other countries. Here, there is no service being provided by the satellite; it is simply being placed in its orbital location after separating from the launch vehicle. Thus, the purpose of the information required by Section 25.137 is not implicated here. For example, Section 25.137(d) requires earth station applicants requesting authority to operate with a non-U.S.-licensed space station that is not in orbit and operating to post a bond.⁶ The underlying purpose in having to post a bond—*i.e.*, to prevent warehousing of orbital locations by operators seeking to serve the United States—would not be served by requiring PanAmSat to post a bond in order to provide approximately six days of LEOP services to the MEASAT-1R satellite.

It is PanAmSat’s understanding that MEASAT-1R is licensed by Malaysia, which is a WTO-member country. It is also PanAmSat’s understanding that at its permanent orbital location of 91.5° E.L., MEASAT-1R will not serve the United States. Thus, the purposes of Section 25.137—to ensure that U.S. satellite operators enjoy “effective competitive opportunities” to serve foreign markets and to prevent warehousing of orbital locations serving the United States—will not be undermined by grant of this waiver request.

Finally, PanAmSat notes that it expects to operate with the MEASAT-1R satellite using its U.S. earth station for a period of approximately ten days. Requiring PanAmSat to obtain copious technical and legal information from an unrelated party, where there is no risk of harmful interference and the operations will cease after approximately ten days, would pose undue hardship without serving underlying policy objectives. Given these particular facts, the waiver sought herein is plainly appropriate.

⁶ See 47 C.F.R. §25.137(d)(4).
