FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PER, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

Washington, DC 20554

Re: Request for Extension of STA to Operate a New 9.2m Ka-band
Antenna at IntelSat's Riverside Teleport

Dear Ms. Dortch:

IntelSat North America LLC ("IntelSat") herein requests a 30-day extension -- through May 22, 2010 -- of the Special Temporary Authority ("STA")¹ previously granted IntelSat to test a new 9.2m Ka-band antenna located at its existing Riverside, CA teleport.² An extension is necessary because late delivery of critical antenna sub-components has delayed the test.

As originally requested, IntelSat will transmit in the 29500-30000 MHz bands and receive in the 19700-20200 MHz bands. Also as originally requested, the antenna will communicate with Galaxy 28 at 89° W.L. during testing. Galaxy 28 will be utilized for antenna gain patterns verification -- transmit and receive in both azimuth and elevation in both polarizations (linear and circular) -- and for cross-polarization patterns verification.

In support of this extension request, IntelSat incorporates by reference the materials submitted with its original STA request to test this antenna -- specifically, the detailed technical information (in Exhibits A-D) that demonstrates that the operation of the earth station at 89° W.L. during testing will be compatible with its electromagnetic environment and will not cause harmful interference into any lawfully operating facility. In the extremely unlikely event that harmful interference should occur, IntelSat will take all reasonable steps to eliminate the interference.

¹ IntelSat has filed its STA request, an FCC Form 159, a \$175.00 filing fee and this supporting letter electronically via the International Bureau's Filing System ("IBFS").

² See *Satellite Communications Services Information: Actions Taken*, Report No. SES-01231, File No. SES-STA-20091204-01561 (Mar. 31, 2010) (Public Notice).

Ms. Marlene H. Dortch
April 16, 2010

For the reasons set forth herein, Intelsat respectfully requests that the Commission grant this extension request.

Sincerely,

Susan H. Crandall
Assistant General Counsel
Intelsat Corporation
