

Attachment 1

Application for Earth Station Special Temporary Authority

NBC Telemundo License Co. ("NBC") hereby requests Special Temporary Authority ("STA") to permit continued operations of Earth Station E000129 (the "Station") in accordance with the technical parameters of license E000129, File Number: SES-LIC-20000313-00407. Due to an administrative oversight, the renewal application was not timely filed with the Commission, necessitating this request for Special Temporary Authority to prevent an interruption of service while the concurrently filed Renewal Application and accompanying Petition for Reinstatement are reviewed and acted upon by the Commission.

The station, located in South Hackensack, New Jersey, is the primary path for NBC's satellite feed from 30 Rockefeller Plaza (the company's headquarters) to its News Channel and, as such, is a vital link for the network. It has consistently been operated pursuant to Commission Rules and Regulations.

NBC regrets the inadvertent administrative error that caused this delay in filing. Specifically, the expiration date was mistyped on an internal docketing system. When it came to the company's attention, action was taken immediately to rectify the error, including filing the required renewal application and this STA within two days of the expiration date and within the 30-day period provided in 47 CFR § 25.163(a)(1) of the Commission's Rules. NBC is reviewing the internal docket to ensure that future deadlines are correctly entered.

In light of the considerations above, we believe the public interest would be served by approval of this STA request to continue operation of E000129.
