## **12. Description**

Hawaii Pacific Teleport, L.P. is currently providing Internet service to International Security Assistance Force (ISAF) military in Afghanistan using JCSAT3A satellite which provides sufficiently short latency between Afghanistan and the USA to enable the military to use the satellite for secure Host/Client communications. However there is now insufficient capacity left on JCSAT3A satellite to support recent new troop deployments in Afghanistan and therefore HPT urgently needs to be able to provide service to Afghanistan on Apstar6 satellite which has capacity available. ISAF is the International Security Assistance Force which is the military force in Afghanistan operated by NATO (North Atlantic Treaty Organization) comprising US and allied troops. It has a US command and is commanded by Gen. Stanley McChrystal.
