

Supplement to Request for Special Temporary Authority

Broadpoint Wireless License Co., LLC (“Broadpoint”) seeks special temporary authority (“STA”) pursuant to Section 25.120 of the Commission’s rules^{1/} to operate the satellite earth station facilities (the “Stations”) currently licensed to PetroCom License Corporation (“PetroCom,” and together with Broadpoint, the “Parties”).^{2/}

On April 29, 2010 the Parties submitted four applications seeking FCC consent to assign several satellite earth station licenses from PetroCom to Broadpoint.^{3/} The Applications cover common carrier and non-common carrier satellite earth station licenses and common carrier and non-common carrier VSAT authorizations. Because the Applications remain subject to public comment until June 4, 2010 (and the FCC may not consent to the Applications until after the public comment period expires), Broadpoint requires an STA in order to close prior to the expiration of the public notice period. Hence, the STA is requested to be effective as of June 1, 2010 for a period of 60 days.

In addition to the satellite licenses covered by the referenced applications, this transaction involves wireless licenses and a Section 214 authorization. As of June 1, 2010, the FCC will have granted its consent to the assignment of all authorizations except for the satellite authorizations.^{4/} In order to close this transaction on June 1st, Broadpoint respectfully requests STA so that it may operate the Stations prior to the end of the public notice period on June 4th.

^{1/} 47 C.F.R. § 25.120.

^{2/} Broadpoint filed four STA requests on May 18, 2010. *See* SES-STA-20100518-00617; SES-STA-20100518-00618; SES-STA-20100518-00619; SES-STA-20100518-00620.

^{3/} *See* FCC File Nos. SES-20100429-00503, SES-ASG-20100429-00504, SES-ASG-20100429-00505 and SES-ASG-20100429-00506 (the “Applications”). The Applications appeared on pre-grant Public Notice on May 5, 2010 (Report SES-01240, rel. May 5, 2010). Applications seeking FCC consent to assign the licenses specified in the Applications were initially submitted on April 19, 2010 and bore the IBFS submission numbers IB2010001219 and IB2010001214). However, because those earlier submitted applications did not distinguish between common carrier and non-common carrier operations, new applications were subsequently submitted and accepted for filing.

^{4/} *See* ULS File Number 0004215316 (filed Apr. 19, 2010; amended application consented to May 19, 2010); IBFS File No. ITC-ASG-20100419-00168) (filed Apr. 19, 2010; granted May 28, 2010).
