

**Inmarsat Hawaii, Inc.**  
**Request for Special Temporary Authority**  
**Exhibit A**

By this filing, Inmarsat Hawaii, Inc. (“Inmarsat Hawaii”) renews its request for special temporary authority to communicate with the Inmarsat 4F3 satellite located at 97.65 degrees W.L. via its earth station located at Paumalu, Hawaii (Call Sign E080059). The current STA is File No. SES-STA-20100427-00484.

Notably, Inmarsat Hawaii has filed an application to permanently modify the existing earth station license for its gateway earth station located at Paumalu, Hawaii to enable it to *receive* certain Global Positioning System (“GPS”) related data as a part of the Federal Aviation Administration's Wide Area Augmentation System (“WAAS”)(File No. SES-MFS-20100204-00162)(“Modification Application”). That application was placed on Public Notice on March 10, 2010 (Satellite Division, Report No. SES-01224). No comments were filed.

Grant of the requested STA would serve the public interest, convenience and necessity by allowing Inmarsat to continue configuring and testing its components of the WAAS system during the scheduled testing period, and until the Modification Application is granted. Doing so thus would facilitate important United States government interests in improving the performance and accuracy of the existing GPS network. Therefore, Inmarsat Hawaii respectfully requests that the Commission grant the requested STA for an additional period of 60 days, beginning June 30, 2010.
