

Exhibit A

PETITION FOR WAIVER OF SECTIONS 25.137 AND 25.114

Pursuant to Section 25.137 of the Federal Communications Commission's ("Commission" or "FCC") rules, earth station applicants "requesting authority to operate with a non-U.S. licensed space station *to serve the United States*" must demonstrate that effective competitive opportunities exist and must provide the same technical information required by Section 25.114 for U.S.-licensed space stations.¹ PanAmSat Licensee Corp. ("PanAmSat") herein seeks authority to provide launch and early orbit phase ("LEOP") services -- not commercial services -- to the United States, and thus believes that Section 25.137 does not apply.

To the extent the Commission determines, however, that PanAmSat's request for authority to provide LEOP services on a special temporary basis is a request to serve the United States with a non U.S.-licensed satellite, PanAmSat respectfully requests a waiver of Sections 25.137 and 25.114 of the Commission's rules.² The Commission may grant a waiver for good cause shown.³ The Commission typically grants a waiver where the particular facts make strict compliance inconsistent with the public interest.⁴ In granting a waiver, the Commission may take into account considerations of hardship, equity, or more effective implementation of overall policy on an individual basis.⁵ Waiver is therefore appropriate if special circumstances warrant a deviation from the general rule, and such a deviation will serve the public interest.

In this case, good cause exists for a waiver of both Section 25.137 and Section 25.114. With respect to Section 25.114, PanAmSat seeks authority only to provide LEOP services for the W3B satellite. The information sought by Section 25.114 is not relevant to LEOP services. Moreover, PanAmSat does not have -- and would not easily be able to obtain -- such information because PanAmSat is not the operator of the W3B satellite, nor is PanAmSat in contractual privity with that operator. Rather, an affiliate of PanAmSat has a contract with Telespazio, the LEOP mission manager hired by the manufacturer of the W3B satellite, to conduct LEOP services for the satellite.

The information that PanAmSat is not including is not required to determine potential harmful interference. The Schedule S information for this satellite would pertain to the operation of the W3B satellite at its final orbital location. However, the present application for LEOP services involves communications *prior* to the satellite attaining its final location in the geostationary orbit. In other words, during the LEOP mission, the earth station will not be communicating with a satellite located in the geostationary orbit. Rather, it will be transmitting

⁴ *N.E. Cellular Tel. Co. v. FCC*, 897 F.2d 1164, 1166 (D.C. Cir. 1990) ("*Northeast Cellular*").

⁵ *WAIT Radio v. FCC*, 418 F.2d 1153, 1159 (D.C. Cir. 1969); *Northeast Cellular*, 897 F.2d at 1166.

to a satellite traveling on its “transfer orbit” or “LEOP path”, which starts immediately following its separation from a launch vehicle, and ends when the satellite reaches its geostationary orbital location. Moreover, as with any STA, PanAmSat will perform the LEOP services on a non-interference basis.

Because it is not relevant to the service for which PanAmSat seeks authorization, and because obtaining the information would be a hardship, PanAmSat seeks a waiver of all the information required by Section 25.114. PanAmSat has provided in this STA request the required technical information that is relevant to the LEOP services for which PanAmSat seeks authorization.

Good cause also exists to waive Section 25.137. Section 25.137 is designed to ensure that “U.S.-licensed satellite systems have effective competitive opportunities to provide analogous services” in other countries. Here, there is no service being provided by the satellite; it is simply being placed in its orbital location after separating from the launch vehicle. Thus, the purpose of the information required by Section 25.137 is not implicated here. For example, Section 25.137(d) requires earth station applicants requesting authority to operate with a non-U.S.-licensed space station that is not in orbit and operating to post a bond.⁶ The underlying purpose in having to post a bond—*i.e.*, to prevent warehousing of orbital locations by operators seeking to serve the United States—would not be served by requiring PanAmSat to post a bond in order to provide approximately six days of LEOP services to the W3B satellite.

It is PanAmSat’s understanding that W3B is licensed by France, which is a WTO-member country. It is also PanAmSat’s understanding that at its permanent orbital location of 16° E.L., W3B will not serve the United States. Thus, the purposes of Section 25.137—to ensure that U.S. satellite operators enjoy “effective competitive opportunities” to serve foreign markets and to prevent warehousing of orbital locations serving the United States—will not be undermined by grant of this waiver request.

Finally, PanAmSat notes that it expects to operate with the W3B satellite using its U.S. earth station for a period of approximately six days. Requiring PanAmSat to obtain copious technical and legal information from an unrelated party, where there is no risk of harmful interference and the operations will cease after approximately six days, would pose undue hardship without serving underlying policy objectives. Given these particular facts, the waiver sought herein is plainly appropriate.

⁶ See 47 C.F.R. §25.137(d)(4).
