Grant Conditions:
Infosat Able Holdings, Inc.
E070072
SES-STA-20110518-00598

Special Temporary Authority is granted from 5-27-2011 to 7-23-2011 (60 days) to operate one Remote2 antenna to maintain continuity of service at a mine located in a remote area of Alaska under the following conditions.

1. Earth station operations are limited to transmission and reception applied for in form 312 of this application.
2. All operations shall be on an unprotected and non-harmful interference basis, i.e., Infosat Able Holdings, Inc. ("Infosat") shall not cause harmful interference to, and shall not claim protection from, interference caused to it by any other lawfully operating station.
3. In the event that there is a report of interference, Harris must immediately terminate transmissions and notify the FCC in writing.
4. Infosat must comply with all FAA antenna height restrictions defined in 47 CFR Part 17.
5. Infosat must make all reasonable and customary measures to ensure that the temporary earth station does not create a potential for harmful non-ionizing radiation to persons who may be in the vicinity of the earth station when it is in operation. At a minimum, permanent warning labels shall be fixed to the earth station and its housing warning of the radiation hazard and including a diagram showing the regions around the earth station where radiation levels could exceed 1.0mW/cm². The earth station operator shall be responsible for assuring that individuals do not stray into the regions around the earth station where there is a potential for exceeding the maximum permissible exposure limits required by 47 C.F.R. §1.1310. This shall be accomplished by means of signs, caution tape, verbal warnings, placement of the earth station so as to minimize access to the hazardous region, and/or other appropriate means.

REQUEST FOR SPECIAL TEMPORARY AUTHORITY

Infosat Able Holdings, Inc. ("Infosat") is the licensee of a VSAT system that operates under the Call Sign E070072. At present, the VSAT license authorizes Infosat to operate up to 10,000 1.2m remote terminals on an ALSAT basis. Infosat is filing concurrently herewith an application seeking to modify its VSAT license by adding authority for a set of 2.4m remote terminals.¹

Infosat hereby seeks Special Temporary Authority ("STA"), for a period of 60 days commencing on May 27, 2011, to operate a single 2.4m remote terminal for the limited purpose described in this request. The remote terminal would be used to maintain continuity of service at a mine located in a remote area of Alaska.

The C-band link which is used at present at the mine for voice and data communications is about to be severed. There are no terrestrial services in this area, so a satellite link is the only means of communicating with corporate headquarters as well as with public safety personnel should an accident occur. Infosat proposes to operate the 2.4m remote terminal at the mine on an STA basis to communicate with Horizons I, which is on the Permitted Space Station List.

The coordinates for the mine are shown in the form that this exhibit accompanies. The technical characteristics of the proposed operations are shown in the attached Schedule B of Form 312 to Infosat's application for modification of its VSAT license. All operations will be on conventional Ku-band frequencies.

Given the safety of life and property considerations at stake, grant of the instant request is in the public interest. Accordingly, Infosat respectfully requests that its STA request be granted.
