IBFS File Nos. SES-STA-20110629-00754 (E000342), SES-STA-20110629-00755 (E000343), SES-STA-20110629-00756 (E000344), SES-STA-20110629-00757 (E000345), SES-STA-20110629-00759 (E050097), SES-STA-20110629-00760 (E050098), SES-STA-20110629-00760 (E050099), SES-STA-20110629-00753 (E970199), SES-STA-20110629-00762 (E050100)

The referenced requests for extension of special temporary authority ARE GRANTED. GUSA Licensee LLC is authorized to operate fixed earth stations in Clifton, Texas (Call Signs E000342, E000343, E000344, E000345, and E970199) in the 5091-5250 MHz (Earth-to-space) and 6875-7055 MHz (space-to-Earth) frequency bands for testing and telecommand, telemetry, and control communications with Globalstar second generation satellites launched October 19, 2010 for an additional period of 60 days beginning June 30, 2011 and ending August 29, 2011, and to operate other fixed earth stations in Sebring, Florida (Call Signs E050097, E050098, E050099, and E050100) in the 5091-5250 MHz (Earth-to-space) and 6875-7055 MHz (space-to-Earth) frequency bands for testing and telecommand, telemetry, and control communications with Globalstar second generation satellites launched October 19, 2010 for an additional period beginning June 30, 2011 and ending August 29, 2011 in accordance with the technical parameters specified in the STA applications, except that the EIRP spectral density of telecommand transmissions shall not exceed 55.2 dBW/4kHz. These temporary authorizations are subject to the following further conditions.

1. All operations pursuant to this authorization shall be on an unprotected and non-harmful interference basis. Operations shall not cause harmful interference to, and GUSA Licensee LLC shall not claim protection from interference caused by, any other lawfully operating station. In the event that harmful interference results, operations shall cease immediately upon notification of such interference, and GUSA Licensee LLC shall immediately inform the Commission in writing of such event.
2. No authority for commercial operation is granted herein.

SES-MFS-20091221-01601

ITU Designation: HIBLEO-X

Dear Ms. De La Torre:

GUSA Licensee LLC (“Globalstar”) hereby requests a 60-day extension of previously granted Special Temporary Authority¹ (“STA”) for ten of its Commission-licensed antennas to communicate with its launched second-generation satellites for purposes of telemetry and control pending grant of the necessary authorizations and registration of its satellites by the government of France, as required by the Commission’s March 2011 *Order*.² Globalstar requests expedited treatment of this extension request because its existing STA for these earth stations expired

¹ See 47 C.F.R. § 25.120. The previously granted STA requests were: SES-STA-20110412-00445 (E050097); SES-STA-20110412-00446 (E050098); SES-STA-20110412-00447 (E050099); SES-STA-20110412-00448 (E050100); SES-STA-20110412-00439 (E970199); SES-STA-20110412-00440 (E000342); SES-STA-20110412-00441 (E000343); SES-STA-20110412-00442 (E000344); SES-STA-20110412-00443 (E000345); SES-STA-20110412-00444 (E030266). Technical exhibits for these antennas are attached to the instant request.

² See *Order, Globalstar Licensee LLC, Application for Modification of Non-geostationary Mobile Satellite Service Space Station License, GUSA Licensee LLC, Applications For Modification Of Mobile Satellite, Service Earth Station Licenses*, 26 FCC Rcd 3948, 3962 ¶ 35 (IB, rel. Mar. 18, 2011) (“*Order*”).

Ms. Mindel De La Torre
June 29, 2011
Page 2

between June 17 and June 22, 2011, and Globalstar requires the continued ability to communicate with its satellites from these antennas.³

As described in the *Order*, Globalstar has embarked on a transition to its second-generation satellite constellation.⁴ This transition involves the launch of 24 new satellites, with the first batch of six satellites launched on October 19, 2010, and preparations for subsequent launches well under way.⁵

The Commission conditioned the grant of Globalstar's application, which includes the authority for its antennas to communicate with the second-generation satellites, upon Globalstar's receipt of certain French authorizations and international registration of Globalstar's satellites by the government of France.⁶ Globalstar is in the midst of the authorization process in France and has submitted all relevant materials in connection with its application. Globalstar hopes to complete this process as expeditiously as possible. In the meantime, Globalstar must be able to continue effective control and monitoring of its launched satellites and, accordingly, requests authority to do so.

The public interest justifications for granting this authority remain substantially the same as those provided in the previous requests. In short, the public interest will be served by the grant of these STA requests because they will ensure effective control center communications with launched satellites, and these operations are necessary to ensure the provision of high quality service to U.S. customers.

Please do not hesitate to contact me with any questions.

³ Details about individual STA terms are contained in the attached technical exhibits.

⁴ *Order*, 26 FCC Rcd at 3590-591 ¶ 5.

⁵ See Press Release, *Globalstar Prepares Six New Second-Generation Satellites For July Launch* (June 8, 2011), <http://www.globalstar.com/en/index.php?cid=7010&pressId=670>.

⁶ See *Order*, 26 FCC Rcd at 3962 ¶ 35 (“The authority to operate granted in connection with these earth station applications shall become effective upon grant by France of an authorization for space operations under the June 3, 2008 French law n° 2008-518 relating to space operations, and only for communications with space stations for which France grants authority and undertakes to register under the United Nations Registration Convention.”).

Exhibit 2: Earth Station Technical Information

GUSA Licensee LLC (“GUSA”) is seeking Special Temporary Authority to operate the Globalstar gateway earth station at Clifton, Texas, with the following parameters:

File Nos. / Call Signs: SES-AFS-20091221-01607 / E970199 (CLFN-1)
SES-MFS-20091221-01608 / E000342 (CLFN-2)
SES-MFS-20091221-01609 / E000343 (CLFN-3)
SES-MFS-20091221-01610 / E000344 (CLFN-4)
SES-MFS-20091221-01611 / E000345 (CLFN-5)

STA term: 60 days, beginning on:
June 18, 2011 for SES-AFS-20091221-01607 / E970199 (CLFN-1)
June 23, 2011 for SES-MFS-20091221-01608 / E000342 (CLFN-2)
June 23, 2011 for SES-MFS-20091221-01609 / E000343 (CLFN-3)
June 23, 2011 for SES-MFS-20091221-01610 / E000344 (CLFN-4)
June 23, 2011 for SES-MFS-20091221-01611 / E000345 (CLFN-5)

Location: Clifton, Texas

Latitude: 31° 48’ 00” N
(31° 47’ 57.4” N to 31° 48’ 3.0” N for CLFN-1 through CLFN-5)

Longitude: 97° 36’ 47” W
(97° 36’ 44.3” W to 97° 36’ 49.2” W for CLFN-1 through CLFN-5)

Transmit frequency: 5091 – 5250 MHz

Receive frequency: 6875 – 7055 MHz

Polarization: RHCP & LHCP

Antenna Size: 5.5 m

Gain: Tx: 47.6 dBi at 5.150 GHz
Rx: 50.2 dBi at 6.975 GHz

Max. antenna height: 27 feet above ground level

Necessary Bandwidth: Transmit bandwidth is 159 MHz
Receive bandwidth is 180 MHz
Maximum carrier bandwidth is 2.5 MHz

Carrier: See table below

<u>Frequency Band (MHz)</u>	<u>T/R Mode & Polarization</u>	<u>Emission Designator</u>	<u>Maximum EIRP (dBW)</u>	<u>Maximum EIRP Density (dBW/4kHz)</u>	<u>Modulation</u>
5091 - 5092	Tx- LHCP	76K0F2D	68	55.2	FM subcarrier on telecommand carrier
6875.95 – 6877.15	Rx – LHCP	7K00G1D			Telemetry carrier
5096 – 5250	Tx – L/RHCP	1M23XXX	59	34.1	White noise modulated carrier for testing
6900 – 7055	Rx – L/RHCP	1M23XXX			White noise modulated carrier for testing
5096 – 5250	Tx – L/RHCP	N0N	59	59	Unmodulated CW for testing
6900 – 7055	Rx – L/RHCP	N0N			Unmodulated CW for testing
5096 – 5250	Tx – L/RHCP	1M23G7W	55	30.1	CDMA/voice and data
6900 – 7055	Rx – L/RHCP	1M23G7W			CDMA/voice and data
5096 – 5250	Tx – L/RHCP	1M23G2W	55	30.1	CDMA/for single-carrier AMSS.
6900 – 7055	Rx – L/RHCP	1M23G2W			CDMA/for single-carrier AMSS
6900 – 7055	Rx – L/RHCP	2M50G2D			Direct sequence CDMA for single-carrier telemetry data
5096 – 5250	Tx – L/RHCP	2M46G7W	55	27.1	CDMA/voice and data
6900 – 7055	Rx – L/RHCP	2M46G7W			CDMA/voice and data
5096 – 5250	Tx – L/RHCP	2M46G2W	55	27.1	CDMA/for single-carrier AMSS.
6900 – 7055	Rx – L/RHCP	2M46G2W			CDMA/for single-carrier AMSS
5091.38 – 5091.62	Tx- LHCP	40K0G2D	68	58	Telecommand carrier
6875.9 – 6879.1	Rx – LHCP	70K0G7D			Telemetry carrier

Maximum EIRP: 68 dBW (for all carriers combined)

Maximum EIRP Density: 59 dBW/MHz

Satellite: S2115 (U.S.-licensed Globalstar Big LEO MSS system)

Orbital Location: NGSO (1414 km altitude, 52 degree inclination)

Elevation Angle (E/W): 5 degrees to 90 degrees

Azimuth (E/W): 0 degrees to 360 degrees

Satellite: HIBLEO-X GLOBALSTAR 2.0 (French-licensed Globalstar Big LEO MSS system)

Orbital Location: NGSO (1414 km altitude, 52 degree inclination)

Elevation Angle (E/W): 5 degrees to 90 degrees

Azimuth (E/W): 0 degrees to 360 degrees

NOTE: The telecommand / telemetry carrier with designator 40K0G2D/70K0G7D are for GLOBALSTAR 2.0 satellites while the telecommand / telemetry carrier with designator 76K0F2D/7K00G1D are for current Globalstar satellites (Call Sign S2115).

Information on MLS Sites

For the Clifton, Texas, Globalstar gateway site, there are four potential MLS sites, i.e., Category III airports, within the 200 nautical mile coordination distance. The Clifton site is located at 31-48-06 N, 97-36-45 W. The airports are:

IAH	Houston – George Bush International Airport, approximately 163 nautical miles from Clifton
AUS	Austin – Bergstrom International Airport, approximately 91 nautical miles away
DFW	Dallas/Ft. Worth International Airport, approximately 71 nautical miles away
AFW	Ft. Worth Alliance Field, approximately 68 nautical miles away

Based on a directory used for MLS coordination purposes, and to the best of its knowledge, GUSA believes that MLS is not active at any of those sites and will not be active during the requested 180-day STA period.

FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMID-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. **PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.**

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

12. Description

GUSA Licensee LLC is applying for an extension of its special temporary authority to operate the TCU earth station antenna at Clifton, Tx to support the launch campaign of Globalstar's second-generation constellation. This antenna will be used to communicate with satellites in Globalstar's first-generation constellation (FCC call sign S2115) and in its French-licensed second-generation constellation. Globalstar has filed five separate applications for extension of special temporary authority -- one for each antenna at the Clifton, Tx location. Globalstar requests that they be processed simultaneously. Multiple earth station antennas provide opportunities for telemetry and control of multiple satellites in view simultaneously at a ground location, which is a common occurrence for a LEO satellite constellation.
