Ms. Marlene H. Dortch Secretary Federal Communications Commission 445 12th Street, S.W. Washington, D.C. 20554

Re: Request for Further Extension of Special Temporary Authority Fort Meade, Maryland Ku-band Earth Station E110095

Dear Ms. Dortch:

Intelsat License LLC ("Intelsat") herein requests an additional 30 days, from October 1, 2011 through October 30, 2011, of the Special Temporary Authority ("STA")¹ previously granted Intelsat to utilize its recently-licensed Fort Meade, Maryland Ku-band earth station E110095 with a minor change in the licensed parameters.² Specifically, as noted in the original STA request, this STA corrects the location of the antenna, which was incorrectly stated in the original license application.³ The correct location is 39° 5' 27.7" and 76° 44' 37.6". The antenna will continue to receive in the 11.7-12.2 GHz frequency band and transmit in the 14-14.5 GHz frequency band, consistent with the permanent license.

Intelsat plans to continue using this antenna to support a U.S. Government customer's service. Accordingly, grant is in the public interest as it would ensure service continuity to the U.S. Government customer.

As noted above, the proposed operations will be consistent with the antenna's licensed parameters with the exception of the antenna's location. Accordingly,

¹ Intelsat has filed this STA request, an FCC Form 159, a \$180.00 filing fee and this supporting letter electronically via the International Bureau's Filing System ("IBFS").

² See Policy Branch Information; Actions Taken, Report No. SES-01377, File No. SES-STA-20110825-01001 (Aug. 31, 2011) (Public Notice); Policy Branch Information; Actions Taken, Report No. SES-01370, File No. SES-STA-20110728-00865 (Aug. 3, 2011) (Public Notice).

³ Because the correct coordinates are more than 10 seconds from those listed in the license, Intelsat cannot simply operate and notify the Commission after the fact per Section 25.118(a) (1)(iv). *See* 47 C.F.R. § 25.118(a)(1)(iv). Intelsat has filed an application to modify the license on a permanent basis to correct the antenna's location. *See Satellite Communications Services Information; Satellite Radio Applications Accepted For Filing,* Report No. SES-01375, File No. SES-MOD-20110802-00927 (Aug. 25, 2011) (Public Notice).

Ms. Marlene H. Dortch September 27, 2011 Page 2

the proposed operations will be compatible with the antenna's electromagnetic environment and will not cause harmful interference into any lawfully operating facility. In the extremely unlikely event that harmful interference should occur, Intelsat will take all reasonable steps to eliminate the interference. . .

Please direct any questions regarding this STA further extension request to the undersigned at (202) 944-7848.

Respectfully submitted,

CAI M

Susan H. Crandall Assistant General Counsel Intelsat Corporation
