

Vizada, Inc.
Request for Special Temporary Authority
4.8 Meter Antenna – Callsign E990027

By this STA, Vizada, Inc. requests Special Temporary Authority to add a 4.8 Meter C-band antenna at its Santa Paula, California teleport under callsign E990027.

Vizada currently has an earth station modification application pending (File No. SES-MOD-INTR2012-01435) to add the 4.8 Meter antenna (“Vizada 4.8 Meter Modification”) and Vizada’s operations as requested by this STA would be consistent with the technical parameters specified in the Vizada 4.8 Meter Modification.

Grant of this STA will serve the public interest because the subject 4.8 Meter antenna will be used to provide service to a U.S. Government customer. This STA is requested to allow testing of services for the U.S. Government while the Vizada 4.8 Meter Modification is pending.

Vizada respectfully requests that the Commission grant this STA for 60 days, beginning July 18, 2012.
