FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

July 11, 2012

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, D.C. 20554

Re: Request for Extension of Special Temporary Authority
Castle Rock, Colorado Earth Station KL92

Dear Ms. Dortch:

Intelsat License LLC ("Intelsat") herein requests a 30-day extension -- from July 15, 2012 through August 13, 2012 -- of the Special Temporary Authority ("STA")¹ previously granted Intelsat to use its Castle Rock, Colorado Ku-band earth station -- call sign KL92 -- to provide launch and early orbit phase ("LEOP") services for the SES-5 satellite that was launched on July 9, 2012.² The LEOP period is expected to last approximately 10 days.³

The SES-5 LEOP operations will continue to be performed in the following frequency bands: 14250.5 MHz and 14499.5 MHz (uplink, RHCP) and 11700.25 MHz, 11698.25 MHz, 11703.3 MHz and 11699.875 MHz (downlink, R/LHCP).

The SES-5 satellite is licensed by the Administration of Sweden. In support of this extension request, Intelsat incorporates by reference Exhibits A and B, which were submitted with its original STA request. Specifically Exhibit A is a waiver request for limited authority for its KL92 earth station to communicate with a foreign-licensed satellite and Exhibit B is a waiver request regarding the requirement in footnote NG104 of the FCC's rules limiting use of these frequencies to international services.

¹ Intelsat has filed its STA request, an FCC Form 159, a \$180.00 filing fee and this supporting letter electronically via the International Bureau's Filing System ("IBFS").

² See *Satellite Communications Services Information; Actions Taken*, Report No. SES-01459, File No. SES-STA-20120523-00469 (June 20, 2012) (Public Notice). The permanent orbital location for SES-5 will be 5.0° E.L. The satellite will be in-orbit tested at 5.2° E.L.

³ Intelsat is seeking authority through August 13, 2012 to accommodate unexpected delays.

Ms. Marlene H. Dortch
July 11, 2012
Page 2

Intelsat does not seek protection for its KL92 earth station with respect to receive operations in the 11700.25 MHz, 11698.25 MHz, 11703.3 MHz and 11699.875 MHz frequencies.

The uplink EIRP for transmissions in the 14250.5 MHz and 14499.5 MHz frequencies is not expected to exceed 88 dBW. This level is within the parameters of the KL92 permanent license.

The LEOP operations will be coordinated with all operators of satellites that use the same frequency bands and are in the LEOP path.⁴ As such, there would be no risk of interference with respect to lawfully operating, co-frequency radiocommunication facilities. Nevertheless, all operators of satellites in that path will be provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs. In the extremely unlikely event that harmful interference should occur due to transmissions to or from its earth station, Intelsat will take all reasonable steps to eliminate the interference.

The 24x7 contact information for the SES-5 LEOP mission is as follows:

Ph.: (202) 944-7701 – East Coast Operations Center (primary)
(310) 525-5900 – West Coast Operations Center (back-up)
Request to speak with Harry Burnham or Kevin Bell.

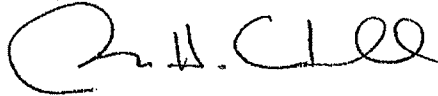

Grant of this STA extension request will allow Intelsat to help launch the SES-5 satellite to the 5.0° E.L. location. This, in turn, will help provide continuity of service at that location, and thereby promote the public interest.

⁴ Space Systems Loral, which is managing the SES-5 launch mission, is handling the coordination.

Ms. Marlene H. Dortch
July 11, 2012
