FCC NOTICE REQUIRED BY THE PAPERWORK REDUCTION ACT

The public reporting for this collection of information is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information. If you have any comments on this burden estimate, or how we can improve the collection and reduce the burden it causes you, please write to the Federal Communications Commission, AMD-PERM, Paperwork Reduction Project (3060-0678), Washington, DC 20554. We will also accept your comments regarding the Paperwork Reduction Act aspects of this collection via the Internet if you send them to PRA@fcc.gov. PLEASE DO NOT SEND COMPLETED FORMS TO THIS ADDRESS.

Remember – You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice. This collection has been assigned an OMB control number of 3060-0678.

THE FOREGOING NOTICE IS REQUIRED BY THE PAPERWORK REDUCTION ACT OF 1995, PUBLIC LAW 104-13, OCTOBER 1, 1995, 44 U.S.C. SECTION 3507.

12. Description

Intelsat License LLC herein requests an additional 30 days, from August 15, 2012 through September 13, 2012, of the Special Temporary Authority previously granted Intelsat to utilize a 9.2m Ka-band antenna located at its Riverside, CA teleport to provide launch and early orbit phase services, as well as provide TT&C services temporarily during the IOT phase, to the EchoStar XVII satellite (E/K/a Jupiter-1 and SPACEWAY-4), which was launched on July 5, 2012.

Re: Request for Further Extension of Special Temporary Authority for 9.2m Ka-band Antenna, Riverside, California

Dear Ms. Dortch:

Intelsat License LLC (“Intelsat”) herein requests an additional 30 days — from August 15, 2012 through September 13, 2012 — of the Special Temporary Authority (“STA”)¹ previously granted Intelsat to utilize a 9.2m Ka-band antenna located at its Riverside, CA teleport to provide launch and early orbit phase (“LEOP”) services, as well as provide TT&C services temporarily during the IOT phase, to the EchoStar XVII satellite (f/k/a Jupiter-1 and SPACEWAY-4), which was launched on July 5, 2012.² The satellite currently is undergoing in-orbit testing.

The EchoStar XVII TT&C operations will continue to be performed in the following frequency bands: 28.351 GHz and

¹ Intelsat has filed its STA request, an FCC Form 159, a \$180.00 filing fee and this supporting letter electronically via the International Bureau’s Filing System (“IBFS”).

² See *Satellite Communications Services Information; Actions Taken*, Report No. SES-01467, File No. SES-STA-20120710-00644 (July 18, 2012) (Public Notice); *Satellite Communications Services Information; Actions Taken*, Report No. SES-01459, File No. SES-STA-20120504-00421 (June 20, 2012) (Public Notice). EchoStar XVII will be in-orbit tested at 107.1° W.L., which is the satellite’s permanent orbital location. The satellite originally was licensed by the United Kingdom and had been authorized to serve the United States. See *Policy Branch Information; Actions Taken*, Report No. SAT-00687, File No. SAT-LOI-20091110-00119 (May 7, 2010) (Public Notice). EchoStar recently applied and was granted authority to license the satellite through the United States. See *Policy Branch Information; Actions Taken*, Report No. SAT-00875, File No. SAT-LOA-20120424-00075 (June 15, 2012) (Public Notice).

Ms. Marlene H. Dortch

28.353 GHz (uplink) and 19.7005 GHz and 19.7025 GHz (downlink).

The TT&C operations have been coordinated with all potentially affected operators. All potentially affected operators have been provided with an emergency phone number where the licensee can be reached in the event that harmful interference occurs.

The 24x7 contact information for the EchoStar XVII IOT mission is as follows:

Ph.: (202) 944-7701 – East Coast Operations Center (primary)
(310) 525-5900 – West Coast Operations Center (back-up)
Request to speak with Harry Burnham or Kevin Bell.

In support of this further extension request, Intelsat incorporates by reference the exhibits submitted with its original STA request, which include a waiver request, as well as detailed technical information that demonstrates that the operation of the earth station will be compatible with its electromagnetic environment and will not cause harmful interference into any lawfully operating facility. In the extremely unlikely event that harmful interference should occur, Intelsat will take all reasonable steps to eliminate the interference.

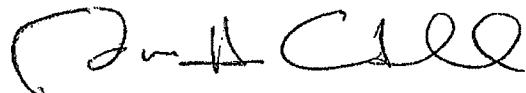

In further support of this further extension request, Intelsat notes that for purposes of the EchoStar XVII IOT mission, it is seeking to operate in the frequencies listed above at the nominal power level of 88 dBW. As noted above, the transmissions proposed herein will be coordinated with potentially affected operators of co-frequency satellites. In the extremely unlikely event that harmful interference should occur, Intelsat will take all reasonable steps to eliminate the interference.

Grant of this STA further extension request will enable Intelsat to help launch the EchoStar XVII satellite. This will serve the public interest by providing additional broadband service to consumers in the United States.

Ms. Marlene H. Dortch
