

# SURE SHOT

TRANSMISSIONS, Inc.  
*...on the move*

December 28, 2012

Mr. Paul Blais  
Chief, Systems Analysis Branch  
International Bureau, FCC

RE: SES-STA-20120920-22841 (Amendment)

Dear Mr. Blais,

We have on file an outstanding request for Special Temporary Authority (STA) referenced above. By this letter SURE SHOT TRANSMISSIONS Inc. modifies the STA as follows: Operation of call sign E940617 will only be in the 14.0-14.5 GHz (Earth-to-space) and 11.7-12.2 GHz (space-to-Earth) frequency bands. Operations will only be with the consent of target satellite operators. Emissions will be limited to no greater than a maximum eirp per carrier of 78 dBW, with a maximum eirp density of 46.01 dBW for emission designator of 36M0F9W.

My request is that the FCC grant SES-STA-20120920-00841, with a begin date of 12/30/2012 and ending date of 01/20/2013, within the limitations above and only with US satellites. SURE SHOT TRANSMISSIONS, INC. will amend the pending modification, SES-MOD-20120912-00810, to specify and clarify all antenna transmit and receive frequency gains, emission designators and effective isotropic radiated power (eirp) and density values, all transmit and receive frequency coordination values and all satellite points of communications.

Thank you very much for your consideration in this urgent matter.

With Regards,

Carolyn Blasko – Financial Director  
SURE SHOT TRANSMISSIONS, INC.
